

WeBID

Web Based State Unique Student Identifier

Simple
Safe
Affordable

Lumen Software's State Unique Student Identifier (WeBID) provides the State Department of Education and districts with a logical methodology to easily track all student enrollment and withdrawal activities. Utilizing a centralized portal for state and district access, the process is easily managed with automated processes to ensure accuracy, saving time and money.

State Department Features

- ✓ Centralized student identification management system.
- ✓ Track student enrollment and enrollment history.
- ✓ Comprehensive record journalizing of all data access and modifications.
- ✓ Ability to process and manage district submitted files.
- ✓ Provide districts a student identification file to automate the update of their own student information.
- ✓ Student picture/image archival for possible utilization by external law enforcement during emergencies.
- ✓ Fully customizable.
- ✓ State defines requirements for successfully obtaining unique student ID's.
- ✓ Easily communicate state information to all state staff as well as districts.
- ✓ System is designed to also handle multiple states simultaneously.
- ✓ System is a module within the Lumenation environment which provides a central portal for state and district access and management. Lumenation provides a data safe, multi-user environment unique to Lumen Software solutions.

District Application Suite Features

- ✓ Access to the state centralized student identification management system.
- ✓ Ability to review a student's enrollment history.
- ✓ Comprehensive record journalizing of all data access and modifications.
- ✓ Ability to easily submit files securely for state processing.
- ✓ Ability to examine processing results of file data submitted and provide interactive data correction.
- ✓ Obtain state generated student ID files to automate the update of their own student information.
- ✓ Easy to use standardized interface.

Additional WeBID Features

- ✓ Batch process - uploading to request ID/download to import back into district's SIS
- ✓ New student ID request and assignment "Claiming" – district claiming a previously ID'd student for their ownership
- ✓ Inter-district communication - district acknowledgement of losing or gaining a student
- ✓ Error detection and resolution for both on line requests and batch requests
- ✓ ID historical logging and student tracking – journaling
- ✓ Student Verification
- ✓ State personnel also have the same functionality to search, obtain and assign unique student ID #'s
- ✓ Student ID's can be housed in the districts SIS
- ✓ Allows for student movement between districts and schools
- ✓ ID's are permanent and not deleted, nor duplicated
- ✓ Allow for inter-district communication
